## PROFESSIONAL SUMMARY

---

Dynamic and results-driven AI/ML Engineer and Full-Stack Developer with hands-on experience in architecting predictive models and scalable web applications. Adept in utilizing frameworks like TensorFlow and Django to deliver optimized, resource-efficient solutions. Seeking to leverage technical expertise in artificial intelligence and software engineering to drive impactful innovation.

## EDUCATION

---

**Bachelor of Technology in Computer Science Engineering**

Expected May 2027

Specialization: Artificial Intelligence

Babu Banarasi Das (BBD) University, Lucknow, UP

## TECHNICAL SKILLS

---

**Programming Languages:** Python, Java

**AI & Machine Learning:** Machine Learning, Deep Learning, OpenCV

**Web Development:** Django Stack, Flask, Tailwind CSS, HTML, CSS, JavaScript, GitHub, and Git

**Databases & Tools:** PostgreSQL

## EXPERIENCE

---

**Hindustan Aeronautics Limited (HAL)**

1 June 2026 - 28 June 2026

*Summer Vocational Intern*

*Lucknow, UP*

- Developed an offline, resource-efficient meeting summarization tool designed to extract valuable insights from transcripts.
- Overcame strict computer hardware specifications and limited resources by optimizing the application script, achieving a 100% functional success rate.
- Collaborated within an industrial environment to ensure the software met rigorous offline operational constraints.

## PROJECTS

---

### GLANCE - AI Attendance System

- Developed a real-time facial recognition system using OpenCV and deep learning algorithms to automate and streamline attendance tracking.
- Engineered a robust pipeline for face detection and identification capable of operating accurately in dynamic environments.
- Integrated a secure database backend to automatically log, manage, and export daily attendance records without manual intervention.

### MeetingMind AI

- Designed an offline, resource-efficient meeting summarization application engineered to extract actionable insights and key points from transcripts.
- Architected a hybrid processing pipeline allowing for direct transcript uploads and raw audio processing to generate automated minutes.
- Implemented export functionality enabling users to download processed summaries in TXT and DOCX formats.

### Interactive Developer Portfolio

- Designed and developed a fully responsive, single-page web application to dynamically showcase technical projects and professional experience.
- Engineered the front-end UI using Tailwind CSS and custom JavaScript for DOM manipulation, powered by a Django backend architecture.

## LEADERSHIP & ACTIVITIES

---

**Hackathon Competitor:** Actively participated and developed a comprehensive web app at the Kalpathon 2.0 Hackathon (BBDU College).

**Academic Mentor:** Providing structured home tuition and personalized academic management for 2 students.
